

CLASSIC SERIES

CADDIE

CABRIOLET CTS

CONGRATULATIONS AND THANK YOU FOR PURCHASING A CHARIOT CARRIER!

Congratulations on choosing a Classic series CTS Trailer, the key component of the world's premiere **Child Transport System (CTS)**. Your new CTS carrier offers superior quality, safety features, and comfort. In addition, Chariot's CTS Conversion Kits can provide you with the versatility to meet all of your child transportation needs.

The CTS Conversion Kits available from your Chariot dealer are the following: 1. Jogging CTS Kit 2. Strolling CTS Kit 3. Hiking CTS Kit

IMPORTANT

Read all instructions before using your Chariot Carrier.

GENERAL WARNINGS

This manual contains many **WARNINGS** and **CAUTIONS**. Read and understand all of the **WARNINGS** and **CAUTIONS**. Failure to assemble and use this carrier correctly may lead to serious personal injury or death to you or your passengers.

- · Do not install a car seat or any other seating device not approved by the manufacturer inside the carrier.
- · Make no modifications to the carrier.
- The carrier may become unstable if a parcel bag or rack not approved by the manufacturer is attached to the carrier.
- · Do not allow any of the child's body, clothing, shoe laces, or toys to come in contact with moving parts.
- · Never leave children unattended in the carrier.
- · Failure to comply with the manufacturer's instructions may lead to serious injury or death to you and to your passengers.
- Maximum capacity of the carrier is 100 lb (45 kg). This includes the weight of the child/children and cargo. Do not use with children who exceed the weight limitations.
- · Do not use cleaning solvents on the carrier. Clean only with mild soap and water.
- · When used with only one passenger, the passenger should be seated in a center seating position.
- · Passengers must always use seat belts.
- · Care must be taken when folding and unfolding to prevent finger entrapment.
- · Never use your carrier to go up or down stairs or on steep hills.
- A reflector that complies with CPSC regulations shall be visible on the rear of the trailer and on the side of the wheels.
- Before each ride, ensure the attached carrier does not interfere with braking, pedaling, or steering of the bicycle.
- Never ride a bicycle at night without adequate lighting. Obey all local legal requirements for lighting.
- · Ride with extreme caution, never exceed 25 km/h, and slow down to less than 10 km/h around corners and on rough roads.
- · Use of a trailer changes the stability, braking requirements and riding characteristics of your bike.
- · Always use flag for increased visibility.
- . Before the carrier can be used with the Cycling CTS Kit, children must be at least 1 year old and able to sit upright unassisted.
- Passengers must always wear a CPSC or CE approved bicycle helmet.

When carrier is used in Jogging or Strolling mode, please observe the following:

- Use wrist safety strap at all times.
- · Always use parking brake when the carrier is stationary.
- · Never in-line skate with your carrier.
- Maximum weight in the rear storage compartment is 2.2 lb (1 kg). The carrier may become unstable if the pocket is overloaded.

CARRIER MAINTENANCE, CARE AND STORAGE

- **A. Hitch Maintenance** Check that the hitch and back up straps are properly secured before every ride. Periodically check the hitch for damage, cracks, etc. Replace at first sign of damage. Any damage/deterioration on any parts of your Chariot carrier should be repaired/replaced immediately to reduce the risk of personal injury.
- **B.** Fabric/Shell Care Your Chariot Carrier is manufactured from a tough, durable, water resistant fabric. Clean fabric with household soap or mild detergent and warm water only. Wipe dry. Do not machine dry.
- **C. Windows -** Do not use your carrier in temperatures below -20°C (-4°F) . Plastic windows can crack at these low temperatures. If carrier is stored/left out in very cold weather you will need to let it warm up before folding or uprighting.
- **D.** Wheels and Axles Wheels should be serviced by a Chariot Dealer at least twice a year. Check wheels for loose spokes and axles for proper security every time you use your Chariot carrier.
- E. Hardware and Fasteners Regularly inspect nuts and bolts to ensure they are tightened securely.
- F. Storage Store your carrier in a dry, well-ventilated area. To avoid mildew, make sure carrier is dry before storing. Keep your carrier out of the sun when not in use to reduce fading. Do not store the carrier attached to your bicycle.

Always inspect all parts every time you use your carrier!

SAFETY GUIDELINES

Sixteen important rules for the safe use of your Chariot Carrier.

- 1. Read all instructions before use! Failure to read, understand and follow these instructions may result in an otherwise avoidable accident in which you and/or your passengers could suffer serious injury or death.
- 2. The safe and proper use of this product is your responsibility! Take a practice bicycle ride, walk/run, or hike with a weighted carrier (weighted greater than your expected load with children and cargo) before using your carrier to ensure you can handle a loaded carrier in each activity. Be extremely careful on hills and try to avoid them if possible. In addition to safe bicycle practices, the rules listed below must be followed at all times.
- 3. Make sure your bicycle is in good working condition. We recommend a frequent safety check of your bike by a certified bicycle mechanic
- 4. Do not modify or alter carrier or bicycle. Ask your Chariot Dealer if you are not sure whether your bicycle is compatible with your carrier.
- 5. When used as a bicycle trailer, children must be at least 1 year old and be able to sit upright alone. Consult your pediatrician before carrying any child younger than one year.
- 6. Do not exceed the maximum carrier load of 100 lb (45 kg). This capacity includes the weight of child/children and cargo. Articles carried in the carrier should be well anchored to avoid shifting during travel. Unstable loads and overloading make the carrier less stable and more difficult to control.
- 7. Always fasten shoulder harness, lap belt and crotch strap securely and tightly around children. Periodically check placement of shoulder straps, especially for a sleeping child. Make sure children cannot put fingers into the wheel spokes. Instruct children not to bounce, rock or lean.
- 8. Do not leave children unattended in the carrier.
- 9. To insure a smooth ride, keep tires inflated to the recommended pressure shown on the tire side wall. Check tire pressure before each use. Over inflating tires or use of high pressure tires can cause the carrier to overturn.
- 10. Use this carrier only with non-motorized bicycles capable of supporting the additional load of the carrier and child. Do not use your carrier on electric bicycles, motorcycles, mopeds, automobiles or any other motor vehicle. Check the information supplied with your bike to verify compatibility or ask your dealer.
- 11. Do not use a kickstand or other parking device to support the bicycle with a trailer attached. Attaching a trailer can change the balance of the bicycle making kickstands ineffective. The bicycle can fall over, damaging it and the trailer.
- **12.** Always use the high visibility flag supplied with the trailer. Do not assume you have the right-of-way. Do not pull your trailer in high traffic areas such as busy streets, highways or anyplace it may be unsafe to ride with children.
- 13. Always verify that the folding brackets are secure and hold the carrier in an upright position.
- **14. Avoid riding at night.** Your ability to see and be seen is greatly reduced. If you must ride at night, use proper lighting and reflectors on your bicycle and wear bright reflective clothing
- **15. Both cyclist and children must wear approved bicycle helmets.** If your child is too small to properly wear the smallest size approved helmet, they should not ride in the carrier.
- 16. Always obey all traffic laws, and use proper hand signals.

WARNING!

Bicycle trailers can tip over causing serious injury to passenger/rider.

Hitting an obstacle with a wheel may cause the trailer to tip over at any speed!

CHARIOT CARRIER CTS CLASSIC SERIES ASSEMBLY

Your Chariot Carrier is shipped 99% assembled. Initial assembly takes a few minutes. After that, folding and unfolding can be done in seconds.

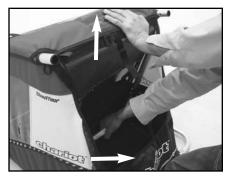

1.0 Erecting and Folding the Carrier

NOTE: Any reference to orientation (left or right) is from the passengers point of view while in the carrier.

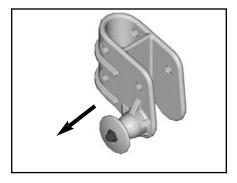

Remove the wheels, the hitch arm, and the high visibility flag from inside the trailer body. Stand at the back of the trailer body. Grad the upper frame and pull up until it stops.

Reach into the back flap and pull back on the inner bar until it "snaps" all the way back over center. Use your hip or knee for leverage to help "pop" the trailer into its full upright position.

WARNING: Ensure that folding brackets are correctly locked before using carrier. Failure to do so could cause the carrier to collapse.

To collapse the carrier, pull the release disks and push on the curved back frame bar until the carrier is completely collapsed.

Note: The carrier can be secured in the folded-down position by looping the webbing, hanging from the back of the seat, through the buckle located at the rear bottom of the trailer.

WARNINGS:

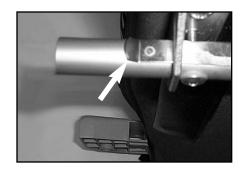

- Only an experienced, strong cyclist should pull a trailer.
- Do not travel faster than 25 km/h and take corners slowly (less than 10 km/h).
- The extra weight will make your bike less responsive. You will need to ride slower. Because of the added weight, it will take longer to get up to speed and you will need more distance to stop. While riding down hill with a trailer you will gain speed more quickly. You will need to use your brakes early and often to keep your speed under control. Remember to apply the rear brake before the front brake, and to use both brakes. It will take longer to cross streets and paths because of the extra length. Turn corners gradually and slowly. A trailer can tip over if a corner is taken too fast and too sharp. Use extra care in all situations.
- Do not ride over curbs, pot holes or other road hazards.
- Stop and walk bicycle when approaching dangerous road conditions (gravel, sand, wet areas, pot holes, railroad tracks, etc.).
 Using the trailer off-road can damage the trailer and injure you or your passengers.
- Take a practice ride before you take your child along. Ride your bike with the trailer (weighted to simulate an occupied trailer) in an open area without traffic until you are skilled in handling your bike with a trailer attached.

1.1 Wheel Assembly

IMPORTANT: To ensure the axle system is engaged properly, test by trying to pull the wheel outwards after installing. The wheel should be locked in its installed position. If not, do not use and take your carrier to your local dealer for servicing.

To insert wheel into axle, simply insert the clevis axle attached to the wheel into the end of the hollow axle. Once fully inserted, you should hear a "click" sound.

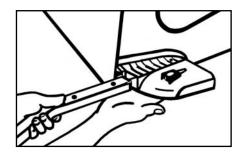

To release the wheel from the axle, there is a safety spring button which needs to be released located on the axle pointed towards the rear of the carrier. Pull this spring button towards the rear of the carrier and remove the wheel.

1.2 Hitch Arm Assembly for Cabriolet

Insert the hitch arm by pressing the small button and sliding the arm into the wheel arm attachment bracket. The large button should engage into the hole on the wheel arm attachment bracket.

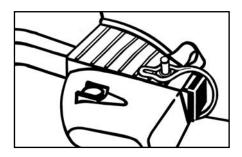

Insert the securing pin down through the small rear hole in the wheel arm attachment bracket.

1.3 Hitch Arm Assembly for Caddie

Insert hitch arm <u>straight</u> into the 'left' hitch arm attachment bracket.

When inserted properly the end cap on the hitch arm should be seen from the back of the hitch arm attachment bracket.

Insert safety snap pin up through the holes in BOTH the hitch arm attachment bracket and the hitch arm. Lock safety snap pin by securing the clip over the pin.

WARNING: Failure to lock safety pin could cause the carrier to separate from the bicycle resulting in serious injury or death.

1.4 Attaching Your New Quick Release (QR) Skewer & Axle Mounted Hitch Cup to Your Bicycle

Remove your existing QR skewer from your bicycle's rear wheel hub. Remove the QR nut and one Skewer Spring from the Hitch QR Skewer.

Insert the Hitch QR Skewer making sure that the cup washer is next to the QR Lever and the Axle Mounted Hitch Cup is on the outside of the bicycle frame drop out. Ensure that the Axle Mounted Hitch Cup is oriented so that the cup itself is below the Hitch QR Skewer and the cup opening is facing forward.

Note: The small diameter of the Skewer Springs should point inward towards the hub axle.

Position the Hitch QR Lever so it points straight out from the hub (open position). Tighten the QR Nut on the opposite end of the Hitch QR Skewer until finger tight.

Move the Hitch QR Lever to the closed position. It should take a noticeable amount of force to close the lever (it should leave an imprint of the lever on your palm). The Hitch QR Lever should always be closed so that the lever points to the rear of the bike. This will prevent the Hitch QR Lever from catching and opening while you are riding.

1.5 Attaching Your Axle Mounted Hitch Cup to Your Bicycle if You Have a Solid Axle Style Hub

Note: The Hitch QR Skewer will not be used with a solid axle style hub.

Remove the axle nut from your bicycles rear wheel hub axle (Note: if there is a washer, remove and discard it – the Axle Mounted Hitch Cup will replace it). Install the Axle Mounted Hitch Cup on the wheel hub axle. Ensure that the Axle Mounted Hitch Cup is oriented so that the cup itself is below the solid Axle Bolt and the cup opening is facing forward. Reinstall the axle nut and tighten.

1.6 Attaching Your Carrier to the Hitch Cup on Your Bicycle

Place the CH-5 Hitch Ball into the Axle Mounted Hitch cup (inserted from the forward open end). Fully insert the hitch ball into axle mounted hitch cup.

Place the Securing Pin through the holes on the front of the Axle Mounted Hitch Cup so as to trap the CH-5 Hitch Ball in the Axle Mounted Hitch Cup. The Securing Pin must be installed from the top of the Axle Mounted hitch cup. Pull the rubber strap over the front of the Axle Mounted Hirch Cup and over the securing pin end. The "Chariot" logo should face forward.

Wrap the Hitch Back-up Safety Strap around the bicycle chainstay and attach the safety clip to the D-ring on the hitch arm. If the Hitch Back-up Safety Strap is not long enough to wrap around the bicycle chainstay (because of a non typical rear triangle), wrap it around the rear axle flange (between the drop out and the wheel hub).

WARNING: Failure to properly install and tighten the QR skewer or axle nut could cause hitch failure and wheel loss resulting in serious injury or death.

Failure to insert securing pin and to latch the rubber strap could cause the carrier to separate from the bicycle resulting in an accident and serious injury.

Failure to properly attach the hitch backup safety strap could result in loss of carrier and serious injury or death to the occupants.

Do not use the hitch if you cannot properly install the hitch back-up safety strap to your bicycle. See your Chariot Dealer for possible alternatives.

1.7 Reflector Assembly

Fasten the red reflector through the grommet on the lower rear panel of the trailer and one yellow reflector onto each wheel.

1.8 High Visibility Flag Assembly and Installation

- **1.** Assemble safety flag by inserting one end of pole into the other.
- Insert flag pole through the small loop, located near the top rear left corner of the trailer, and straight down into the sleeve.

Note: Remove the flag before collapsing the trailer or the flag pole will break.

WARNING: Do not ride without flag in place. Failure to use high visibility flag could result in an otherwise avoidable accident.

1.9 Weather Cover Features

Attach the loops from the back comer of the weather cover over the aluminum sleeves located at the upper rear section of the carrier.

Fasten the front corners of the weather cover to the snaps located on the front lower corners of the frame.

Note: Your Chariot Carrier has climate control features designed to regulate your child's temperature. Periodically monitor your child to ensure that he/she is comfortable in terms of temperature.

WARNING: Failure to use the weather cover could expose your child to flying rocks, insects, and other debris.

During cooler temperatures use the rain cover to keep your child warmer. If this is too warm or you are worried about ventilation, open one or both of the small triangular side vents (for Corsaire models). For more ventilation, roll up the rain cover and secure it by looping the elastic loops around its ends. If it is bright outside or the sun is bothering your child, use the back panel as a sunscreen. To do so, remove the weather cover, flip the back panel over the front of the carrier, secure it to the Velcro tabs located on the upper frame, and re-install the weather cover.

1.10 Child Placement and Seatbelts

WARNING: Failure to properly attach seatbelts could result in serious injury or death to occupants in the event of an accident.

WARNING: Failure to seat a single child in the center position could cause the carrier to tip over causing serious injury or death.

WARNING: Always adjust shoulder harness and crotch strap so they meet at child's lower chest. Adjusting harnesses and buckles near your child's neck could cause serious injury.

TWO CHILDREN (Cabriolet)

All Corsaire carriers come with a padded shoulder harness. Shoulder harness length can be adjusted by removing the shoulder harness straps from either one or both of the adjustment loops. The harness is adjusted to the middle position on the small child and the long position on the larger child as in the diagram. The third and final arrangement is achieved by removing the straps from both adjustment loops.

- Lift shoulder harnesses and Velcro to upper seat frame, so that harnesses do not interfere with seating the children.
- Seat children in carrier, place outer crotch straps between legs of children and adjust so buckles are centered on children's lower chests.
- Place shoulder harnesses over children's head and slide ladder locks downwards to fit the harnesses snugly over their shoulders.
- 4. Secure the bottom of the harnesses with the buckles on the crotch strap.
- Pull the loose strap ends from over the children's shoulders to snugly secure the top of the harnesses.
- 6. Fasten lap belt buckles and tighten snugly.

ONE CHILD (Cabriolet)

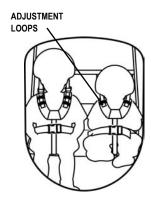

- 1. Remove both shoulder harnesses from ladder lock buckles.
- 2. Install one shoulder harness in the center seat using the two center ladder locks. (see diagram at right). Thread the shoulder harness straps up through the ladder locks, pull over and towards your self, then thread straps back down through the ladder locks.
- 3. Seat child in center seating position, place the center crotch strap between child's legs and adjust so buckle is centered on child's lower chest.
- **4.** Place shoulder harnesses over children's head and slide ladder locks downwards to fit the harnesses snugly over their shoulders.
- 5. Secure the bottom of the harnesses with the buckle on the crotch strap.
- 6. Pull the loose strap ends from over the child's shoulders to snugly secure the top of the harness.
- 7. Fasten lap belt buckle and tighten snugly.

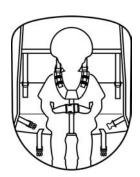

TWO CHILDREN (Caddie)

- 1. Unclip both shoulder harnesses from the side release buckles and unthread them from the O-rings.
- 2. Seat children in carrier.
- 3. Place the outer crotch straps between children's legs and adjust so O-rings are centered on children's lower chest.
- 4. Thread the shoulder harnesses through the backside of the O-rings, clip into buckles over the children's right shoulder and tighten by pulling the loose strap ends from over the children's left shoulder.
- 5. Fasten lap belt buckles and tighten snugly.

ONE CHILD (Caddie)

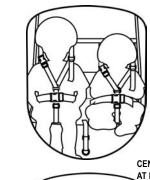

- 1. Seat child in center seating position.
- Place the center crotch strap between child's legs and adjust so O-ring is centered on child's lower chest.
- 3. Thread right hand shoulder harness through the back side of the O-ring, clip into buckle over the child's left shoulder, and tighten by pulling the loose strap end from over the child's right shoulder.
- 4. Fasten lap belt buckle and tighten snugly.

ACCESSORIES

The following high quality Chariot accessories are available for purchase at your local Chariot retailer.

Chariot CTS Conversion Kits:

Stroller Kit: Handlebars, parking brake, safety wrist strap, storage bag and stroller casters for Cabriolets.

Caddie Walker Kit: Handlebars, brake straps, safety wrist strap and stroller attachment.

Jogging Kit: Wheel arms, front wheel, handlebars, parking brake, and storage bag for Cabriolets.

Partial Stroller Kit: Stroller casters.

Hiking Kit: Extended hiking arms and adjustable harness.

Chariot Accessories:

Hydration Kit: Water bottles and brackets for Jogging/Strolling Kits.

Jogging Brake Kit: Brake and attachment for Cabriolet Jogging Kit.

Travel Bag: Heavy duty travel bag with wheel covers for double child carriers.

Chariot Backpack Set: A backpack/diaper bag for parent and a small backpack for junior.

Axle-Mount ez-Hitch™ - Partial: Hitch components required for adding a hitch to a second bike.

Storage Cover 2: A cover to protect double child carriers from the elements (while stored).

Infant Sling: A lateral support sling for the youngest Chariot passengers.

Bunting Bag: An over-sized, all season bunting bag.

Baby Supporter: To assist a baby with sitting upright and adds extra comfort during naps.

LIMITED LIFETIME WARRANTY/GARANTIE À VIE LIMITÉE

CHARIOT CARRIERS INC. warrants that the frame is free of defects for the lifetime of the product. The fabric and hitch are warranted for one year following the date of delivery to the original purchaser. This warranty does not include the wheels and tires. This warranty is valid only to the original purchaser and under normal use.

Repairs must be made by **CHARIOT CARRIERS INC**. or an authorized dealer, otherwise this warranty is void. **CHARIOT CARRIERS INC**. reserves the right to repair or replace the warranted carrier.

This warranty does not apply to damages caused by misuse of this product, accidental or intentional damage, neglect or commercial use. Excluded from this warranty is liability for consequential property or commercial damages or for damages for loss of use. This constitutes the only warranty of **CHARIOT CARRIERS INC.** and its authorized agents and dealers and no other warranty or conditions, statutory, parole, collateral or otherwise (including conditions requiring compliance with description, fitness for purpose and merchantable quality) shall be implied.

CHARIOT CARRIERS INC. garantit le cadre contre tout défaut tant que le produit sera utilisé et garantit aussi le tissu ainsi que le dispositif d'attelage pendant un an à compter de la date de livraison du produit à l'acheteur d'origine. La présente garantie ne s'applique pas aux roues ni aux pneus et elle n'est valable que pour l'acheteur d'origine, dans des conditions normales d'utilisation.

Les réparations doivent être effectuées par **CHARIOT CARRIERS INC**. ou un détaillant autorisé sans quoi la garantie devient nulle et non avenue. **CHARIOT CARRIERS INC**. se réserve le droit de réparer ou de remplacer la remorque.

La présente garantie ne s'applique pas à des problèmes découlant d'une utilisation abusive du produit, aux dommages intentionnels ou accidentels, aux cas de négligence ni à ceux d'utilisation à des fins commerciales. La garantie ne porte pas non plus sur la responsabilité pour dommages indirects à la propriété ou aux biens, ni à la privation de jouissance. Il s'agit de la seule garantie accordée par CHARIOT CARRIERS INC. et ses détaillants ou agents autorisés. Aucune autre garantie ou condition réglementaire, verbale, accessoire ou autre (y compris toute condition exigeant la conformité à la description, à l'usage souhaité ou à la qualité marchande) n'est sous-entendue.

WARRANTY/GARANTIE

To validate your warranty and for contacting you for any future potential safety notices, please complete the following information and send to:/Pour que votre garantie entre en vigueur, fournissez les renseignements suivants et faites-les parvenir à: Chariot Carriers Inc., Bay F, 6810 – 6th Street SE, Calgary, Alberta, T2H 2K4, CANADA.
